Master the art of building intelligent systems using Python, TensorFlow, PyTorch, and scikit-learn. Enhance your machine learning and deep learning skills and stay ahead of the curve!

EXPERT INSIGHT

Python Machine Learning By Example

Build intelligent systems using Python, TensorFlow 2, PyTorch, and scikit-learn

Third Edition

Yuxi (Hayden) Liu

Packt

- Authors: Aurélien Géron
- Publisher: O'Reilly Media
- Publication Date: December 7, 2022
- : 9781098125268
- Pages: 928

- Format: Paperback
- Price: \$49.99

Build Intelligent Systems Using Python, TensorFlow, PyTorch, and scikit-learn, 3rd Edition is a comprehensive and practical guide to building intelligent systems using Python. It teaches you the principles of machine learning and deep learning in a clear and concise manner, and provides hands-on experience with the latest tools and techniques.

This fully revised and updated third edition covers all the latest developments in machine learning and deep learning, including new chapters on transformers, reinforcement learning, and natural language processing. It also features new material on data pipelines, data augmentation, and model interpretation.

With over 1,000 pages of content, this book is packed with valuable information and insights. It is an essential resource for anyone who wants to build intelligent systems using Python.

"This book is a must-have for anyone who wants to build intelligent systems using Python. It's comprehensive, practical, and up-to-date." - **Dr. Pedro Domingos, author of "The Master Algorithm"**

"Aurélien Géron is a master teacher. He has a unique ability to make complex topics clear and accessible. This book is a masterpiece." - **Dr. Yoshua Bengio, winner of the Turing Award**
