The book 'Dead Serious Wild Hope Amid The Sixth Extinction' by Billy Parish is a must-read for anyone who cares about the future of our planet. It's a honest, unflinching look at the threats facing our wildlife and ecosystems, but it also offers a message of hope. Parish argues that we can still save our planet, but only if we act now.

Parish begins the book by introducing us to some of the amazing creatures that are currently facing extinction. He writes about the vaquita, the world's smallest porpoise, which is now on the brink of extinction due to habitat loss and overfishing. He also writes about the Sumatran orangutan, which is threatened by deforestation and poaching. These are just two examples of the many species that are at risk of disappearing forever.

Parish doesn't shy away from the difficult truths about the threats facing our planet. He writes about climate change, habitat loss, overfishing, and pollution. He argues that these threats are all interconnected, and that we need to address them all if we want to save our planet.

Despite the challenges, Parish offers a message of hope. He argues that we can still save our planet, but only if we act now. He calls on us to reduce our carbon emissions, protect our forests, and eat less meat. He also urges

us to support conservation organizations and to get involved in our communities.

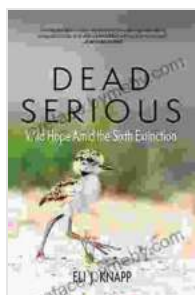

'Dead Serious Wild Hope Amid The Sixth Extinction' is a powerful and moving book that will change the way you think about the future of our planet. It's a must-read for anyone who cares about the environment and wants to make a difference.

## About the Author

Billy Parish is an award-winning journalist and author who has written extensively about the environment. He is the former editor of Audubon magazine and the author of several books, including 'The Last Extinction' and 'The End of Ice'.
